SEARCH.COM

Welcome to personalize SEARCH.COM. You can put all your favorite searches onto your own personal page in three steps. All you need is a few favorite search tools, a few minutes, and a cookie-capable browser (Netscape Navigator or Microsoft Internet Explorer).

The steps are really simple. How simple? Try this on for size:

step 1: select the categories you're interested in.

step 2: from the next page, select the search engines you're interested in (and add a few favorite Web links too, if you like).

step 3: from the next page, tell us the order in which you'd like to list your choices.

Sound easy enough? OK, go ahead and do it.

step 1

Because SEARCH.COM has several hundred search engines in its collection, we've organized them into subject areas so that you're not overwhelmed by titles. Just pick any subject that interests you, click in the box until a checkmark appears, then move on. After you reach the bottom of the page, click on the Let's Go button.
